# Security Awareness Training And Simulated Phishing Tests

## Enabling your organization to be cyber secure

### Employees Are Main Targets And The Weakest Links In Your Cyber Defense

Cybersafe Solutions Security Awareness Training educates your users so they don't fall victim to modern cyberattacks.

### Cybersafe Solutions Security Awareness Training is a proven four-step process:

- **Assess** – Establish a baseline to understand the phish-prone percentage of your users through a simulated phishing attack.

- **Train** – On-demand, interactive, engaging web-based training discusses the mechanisms of Spam, phishing, malware, and the dangers of social engineering.

- **Phish** – Schedule one-time, weekly, bi-weekly, or monthly simulated phishing attacks to improve and maintain employees' ability to effectively identify social engineering attacks.

- **Report** – Report on an enterprise-strength level, showing stats and graphs for both training and phishing. Gain insight, visibility of training effectiveness, and track compliance.
